DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3, 5-8 and 10-13 are allowed.
2. The following is an examiner's statement of reasons for allowance: The cited prior art does not teach a method for minimizing the error of a signal to be measured using filtering at variable bandwidth that includes the steps of determining an absolute value of the distance of an observed filter output to at least one further filter output having lower bandwidth; if the absolute value falls below a threshold value, which is a predefined multiple of the intrinsic noise of the measuring sensor, using the observed filter to display the signal; if the absolute value exceeds the threshold value, recognizing a significant change of the information component in the signal and using a filter having a higher bandwidth or lower response time to display the signal; wherein the difference of the signal from a version of the signal whose bandwidth is delimited more strongly is observed as a variation of the signal; and wherein the bandwidth is regulated on the basis of a physical criterion inherent to the method in such a way that signal changes not caused by noise are recognized.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
